

# ***The Preferred Choice...***

***More and More Kollsman EVS Flying  
Each and Every Day***

Since pioneering the world's only FAA certification of an Enhanced Vision System (EVS) in 2001, Kollsman's "All Weather Window ®" EVS is changing the way business and commercial aircraft pilots fly. Currently, the "All Weather Window ®" EVS is certified for installation on Gulfstream G-V®, GIV-SP®, G400™, G500™, and G550™ aircraft. The "All Weather Window ®" EVS is also planned for certifications on other aircraft models, including the G300™ business jet. Kollsman's EVS allows pilots to see through darkness and low visibility conditions allowing pilots to detect and see terrain and runway environment during approach sooner, thus enabling safer approaches, improving situational awareness, and aiding with the prevention of runway incursions.

EVS FAA CERTIFIED
