

“The Eyes of the Cobra Are Now Even Deadlier”

The Kollsman Night Targeting System (NTSU) is an upgrade to the NTS for the AH-1W Super Cobra. This state-of-the-art sensor suite provides improved accuracy from the air to support troops on the ground.

- New advanced day and night thermal vision for adverse weather & battlefield smoke
- Color CCD Capability
- Color multi-function display for improved situational awareness
- Increased reliability & maintainability
- Fires all TOW & Hellfire missiles
